

PortFinder provides a means for reliably tracing a circuit from the workstation all the way to the router or switch while retaining full Category 6 bandwidth capabilities. Accessories allow communication over the circuit as well.

PortFinder

Features:

- Provides visual indications of all interconnect points for a given cable run
- Passes indicator signal through existing building wiring
- Passes Cat5E and meets Cat6 cabling standards
- Anti-Snag design for easy installation
- Coaxial indicator connections provides reliable, 'first attempt' activation

PortFinder Connector
